

CAREERS

Are you interested in pursuing your career at a company that really values each person?
We have an opening for a Project Engineer that may be right for you.

Join one of the best work teams in the Chicago area to invest your work time. We are an award-winning workplace of energetic, talented people who fabricate and manufacture stainless steel and are seeking a Project Engineer to join our team. In this position, you need to be able to establish relationships with customers and suppliers. You will also be responsible for Estimating, Project Planning, and Customer Service/Account Management.

Reasons to work for Ace Metal Crafts Co:

We are devoted to having a workplace that supports each of our team members in making high quality products and working together to be the best at what we do. We are a sheet metal fabrication company specializing in stainless steel, servicing the Midwest. Our customers are Original Equipment Manufacturers (OEM's) that are primarily in the food processing, food packaging, and pharmaceutical industries. We pride ourselves on our customer responsiveness which has made us successful for a number of years.

Here's the things you'll do:

1. Estimator

Objective/Outcome: We secure targeted business opportunities by providing quotes and proposals on metal solutions with technical expertise.

2. Project Planner

Objective/Outcome: We utilize our fabrication expertise to plan and communicate requirements to our value streams ensuring Ace delivers a product that meets our customer expectations.

3. Project Manager

Objective/Outcome: We achieve the customer specified quality at the highest possible gross margin thru close follow-up and collaboration with our value streams.

4. Customer Service \ Account Manager

Objective/Outcome: We maintain our competitive advantage over our low-cost or geographically closer competition through exceptional customer service.

What you need to know already:

Qualifications:

- BS in Mechanical Engineering or 5 years metal fabrication engineering experience
- ERP experience
- Microsoft Word and Excel
- Excellent communication skills.
- Extensive blueprint reading ability.
- Understand fabrication processes and shop floor practices.

- Ability to plan a fabrication process that achieves the quality level expected.
- Ability to recognize when special tooling or fixtures are required.
- Understand the capabilities of the fabrication equipment and when to outsource operations.
- Understand the abilities of the shop floor personnel.
- Understand the costing structure and bring projects complete within budget.

Benefits offered to full-time employees:

- Competitive compensation
- Health and Dental insurance
- Quarterly profit sharing
- 401(k) Plan with company match
- Paid vacation and holidays
